## Money Exchange Game

Set up 2 groups, a larger group of travellers and a smaller group of Bureau de change workers. Give each group a set of cheques that they can write in the correct currency.

## Group 1

You are going on holiday. You are going to visit 10 countries on your world travels, and obviously, you will need some money in each country.

You have saved £600 and can spend any amount up to that.

Now choose your 10 countries to visit ,then decide how much you will want to spend in each country in £ (it may be worth checking how much foreign currency you expect in exchange) Visit the Bureau de Change and ask for that much money in the currency you require (for example " Can I have £10 in Malaysian Ringgits please"). They will give you the money , but they may make a small charge. That is normal. Check you have what you need and off you go.

When you have all the money , work out how much you have in £ to check you have not lost any. DON'T FORGET TO SUBTRACT ANY CHARGES THE BUREAU DE CHANGE MADE.

## Group 2

You are the manager of a Bureau de Change. Your job is to change  $\pounds$  into foreign currency <u>or</u> foreign currency into  $\pounds$ .

People will come into your Bureau and ask you to give them , for example, £10 of Malaysian Ringgits. You must work out how much you must give them, but you may make a charge of £1 each time you change money.

Keep  $\,$  a record of how much you take in in £ and how much you give out in foreign currency.

At the end of the day, add up how much you have taken in in  $\pounds$ . Also convert all the currency you have given out back into  $\pounds$ . The 2 figures should be the same, but with a small profit for the charges you made.

You should have taken more money in than you have paid out. If you haven't then you have lost me a lot of money and I'll send the boys round to sort you out!
